30 Terrano Plumbing says the pipe intersecting the city sewer needs replaced and they recommend other procedures be done also.	31	Notes: The sewer lines are being checked before we start the paving project. If a problem is detected, it would need to be completed before the paving project could start. Peter Tedone and Sharon Dowling met with all the parties involved for the paving project to assure we are all on the same page. Waiting on final quotes. The plumbing fix for the sewer lines is expensive. The board is working on a way to conduct meetings safely in order to determine how to proceed on the sewer line fix. It is very possible that this plumbing issue will delay the paving project until 2021.
